BUG REPORT DOCUMENT

1.
Current:
Registration is possible without selecting gender.
Expected:
Registration should not be possible without selecting gender.

2.
Current:
"Name" field can take numbers and special characters and has no input length limit.
Expected:
"Name" field should not take numbers nor special characters and should have input length limit.

3.
Current:
"Last Name" field can take numbers and special characters and has no input length limit.
Expected:
"Last Name" field should not take numbers nor special characters and should have input length limit.

4.
Current:
It is possible to select a non existing date like: "31.02.2022".
Expected:
It should not be possible to select a non existing date like: "31.02.2022".

5.
Current:
"Address" can take special all characters and has no input length limit.
Expected:
"Address" should not take all special characters and should have input length limit.

6.
Current:
"Zip Code" has many other available countries in the the console, yet only 4 countries are possible to choose from(SRB, BIH, CRO, SLO).
Expected:
"Zip Code" should perhaps offer the ability to choose from many other countries.

7.
Current:
"Zip Code" can take special characters and letters too.
Expected:
"Zip Code" should take only numbers.

8.
Current:
"City" can special characters and numbers too.
Expected:
"City" should take only letters.

9.
Current:
"Phone" can take numbers and special characters and has no input limit length.
Expected:
"Phone" should take only numbers, maybe even offer a dial code from the country selected above and it should have set input length.

10.
Current:
"News" has no information message next to it saying what is exactly meant by this term.
Expected:
"News" should have a information message next to it saying what is exactly meant by this term.

11.
Current:
"Password" has only 1 criteria – to have at least 6 characters.
Expected:
"Password" should have multiple criteria – to have at least 6 characters, to have at least 1 capital letter, to have at least 1 special character etc. .

12.
Current:
When registering as a company, all of the details except "phone" and "email" from the details of the company section don't have a asterisk (*) next to their corresponding label and yet they are required fields.
Expected:
When registering as a company, all of the details except "phone" and "email" from the details of the company section should have a asterisk (*) next to their corresponding label since they are required fields.

13.
Current:
"OIB" does not display in it's error message that OIB must be a 11 string number.
Expected:
"OIB" should display in it's error message that OIB must be a 11 string number.

14.
Current:
After inserting all required fields and clicking "register", it takes about 2 seconds to get a successful registration message and it takes around 2 minutes to receive the registration email.
Expected:
After inserting all required fields and clicking "register", a successful registration message should appear almost immediately and receiving the registration email should happen in the shortest period possible.

15.
Current:
When a user registers and uses go back button from the browser, he is sent back to the form with all the details he entered.
Expected:
When a user registers and uses go back button from the browser, he should be sent to the main page.

16.
Current & Expected: Instead of using the dropdown and thus enabling a user to select a non existing date, there should be a calendar placed instead which will prohibit any user to select an invalid date.

17.
Current:
These error messages do not have (.) at the end of the sentence:
Ime je potrebno, Elektronska pošta je potrebna, Pogrešan e-mail, OIB tvrtke je potreban, Poštanski broj je potreban, Grad je potreban .
Expected:
All error messages should have a (.) at the end of the sentence.

18.
Current:
After inserting a valid password and leaving the confirm password empty, the confirm password error message label is saying: Lozinka je potrebna.
Expected:
After inserting a valid password and leaving the confirm password empty, the confirm password error message label should be saying: Potvrda lozinke je potrebna.

19.
Current:
"Zip Code" 73457 is showing the city of Essingen which is in Germany, however the chosen country that gets selected is Croatia.
Expected:
All zip codes should be checked once again since further errors like the above may be everywhere.

20.
Current:
Auto-selected "Country" is always in English whereas everything else is in Serbian language.
Expected:
We should strive for using only one language at a time.

21.
Current:
All labels don't start with first capital letter and (:) at the end.
Expected:
OIB tvrtke: , Email tvrtke: , Telefon: , Kontakt osoba: .

*Here are some of the books that have influenced my thinking/coding practices:
book - "How Google Tests Software"
Books from Dr Sinisa Vlajic from the FON University
All books regarding Java from the "Head First Publisher"
Etc.
